

Physical Hazards

Streamvale farm is a working farm with designated areas available for public use. Some of these areas contain physical hazards.

We see the areas of risk as being

- Play areas
- Nature Trail
- Picnic Areas.

As such we

- Use "child friendly", clearly understood notices to inform people of simple hazards as holes, the stream, low branches, dirty areas etc.
- Provide each visitor with the "be safe" notice detailing hazards.
- Regularly check all play areas and make sure they are free from any problematic hazards
- Regularly check all play equipment and remove, repair or replace as necessary
- Regularly check all paths and make sure they are free from any problematic hazards
- Control stinging weeds in public access areas
- Check all fences and repair or replace if necessary.
- Check picnic tables and repair or replace if necessary.
- Close off any public access to areas may present a hazard
- Report and record all information concerning safety issues.
